Professional Summary

Computer Science student at COMSATS University with hands-on experience building full-stack web applications using MERN stack, Next.js, and TypeScript. Developed and deployed a production-ready peer-to-peer savings platform with Stripe integration, JWT authentication, AES encryption, and 30+ REST APIs. Passionate about backend engineering, scalable systems, and AI-powered applications.

Education

BS Computer Science
Expected Graduation: 2027

COMSATS University Islamabad

Projects

TrustCom — Committee Management System

Next.js, TypeScript, MongoDB, Stripe

- Built and deployed a production-grade peer-to-peer savings platform with real users
- Implemented JWT authentication, AES-256 encryption, role-based access control
- Integrated Stripe payment gateway and built 30+ REST APIs
- Deployed on Vercel with full production setup

AI Learning Assistant

React.js, Node.js, MongoDB, Gemini API

- Built AI-powered system that generates quizzes, flashcards, and summaries from PDFs
- Integrated Gemini API for document-based intelligent Q&A
- Implemented JWT authentication and persistent MongoDB storage

AdFlow Pro — Classified Ads Platform

MERN Stack

- Developed online marketplace for posting and managing classified ads
- Implemented moderation system reducing spam by 95%
- Optimized backend performance for 100+ concurrent users

Doctor Appointment System

MERN Stack

- Built full-stack booking platform with real-time availability system
- JWT authentication with email notifications and dashboard system

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, WebSockets

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Postman, Docker, Vercel, Stripe

AI: Gemini API, LLM Integration, Prompt Engineering

Certifications

Cisco Networking Academy — Python Essentials

IBM SkillsBuild — AI Fundamentals

Codecademy — JavaScript

Simplilearn — MongoDB Basics
